		8.3.14. Has IEEE 802.1s Multiple Spanning Tree provides high link availability in VLAN environments where multiple spanning trees are required; and legacy support for IEEE 802.1d and IEEE 802.1w. 8.3.15. With the following ports: 8.3.15.1. 1x Console Port 8.3.15.2. 1x USB port 8.3.16. Has jumbo frames allow for high-performance backups and disaster-recovery systems; provides a maximum frame size of 9k bytes. 8.3.17. Has packet storm protection against broadcast and multicast storms with user-defined thresholds Smart link enables simple, fast converging link redundancy and load balancing with dual uplinks avoiding Spanning Tree complexities. 8.3.18. Has management interface control enables or disables each of the following depending on security preferences; console port; or reset button. 8.3.19. Has industry-standard CLI with a hierarchical structure for reduced training time and expense. 8.3.20. Management security restricts access to critical configuration commands, provides multiple privilege levels with password protection and local and remote syslog capabilities allow logging of all access. 8.3.21. Has SNMP v2c/v3 provides SNMP read and trap support of industry standard Management Information Base (MIB), and private extensions. 8.3.22. Has Remote monitoring (RMON) with standard SNMP to monitor essential network functions. Supports events, alarms, history, and statistics groups as well as a private alarm extension group; RMON, and sFlow provide advanced monitoring and reporting capabilities for statistics, history, alarms and events.

		B.3.23. Has TFTP and SFTP support offers different mechanisms for configuration updates; trivial FTP (TFTP) allows bidirectional transfers over a TCP/ IP network. Secure File Transfer Protocol (SFTP) runs over an SSH tunnel to provide additional security. B.3.24. Has Network Time Protocol (NTP) synchronizes timekeeping among distributed time servers and clients; keeps timekeeping consistent among all clock-dependent devices within the network so the devices can provide diverse applications based on the consistent time. B.3.25. Has IEEE 802.1AB Link Layer Discovery Protocol (LLDP) advertises and receives management information from adjacent devices on a network, facilitating easy mapping by network management applications. B.3.26. Provide independent primary and secondary operating system files for backup while upgrading. B.3.27. Able to assign descriptive names to ports for easy identification. B.3.28. Has multiple configuration files can be stored to a flash image. B.3.29. Has unidirectional link detection (uOLD) which monitors the link between two switches and blocks the ports on both ends of the link if the link goes down at any point between the two devices. B.3.30. Has VLAN support and tagging for IEEE 802.1Q (4K VLAN IDs). B.3.31. Has jumbo packet support improves the performance of large data transfers; supports frame size of up to 9000 bytes. B.3.32. Has Bridge Protocol Data Unit (BPDU) tunnelling that Transmits STP BPUDUs transparently, allowing correct tree calculations across service providers, WANs, or MANs.
